

Alchemy's Bathroom Renovation Checklist

1. Set renovation goals: Define the purpose of your renovation-resale, comfort, or fixing issues.
2. Finalise your budget: Account for labour, materials, and a 10-20% contingency buffer.
3. Measure your space: Record all dimensions and note existing plumbing and electrical points.
4. Design your layout: Plan the position of each fitting to optimise space and functionality.
5. Choose fittings and finishes: Select vanities, tiles, tapware, lighting, and colour schemes.
6. Hire certified trades: Find licensed professionals for plumbing, electrical, and waterproofing.
7. Obtain consents (if required): Apply for council consent for any structural or plumbing changes.
8. Order materials early: Prevent delays by ordering custom or high-demand items in advance.
9. Schedule demolition: Coordinate a time for removal of old fixtures, tiles, and wall linings.
10. Monitor progress weekly: Check in regularly to ensure the project stays on schedule.
11. Conduct final inspections: Review all workmanship and test all installed fixtures.
12. Request compliance certificates: Collect official documentation for plumbing, electrical, and waterproofing.
